# Introduction

What is huge and mess  
blue sea <sup>is</sup> a mess. Guess what  
killer whale eat people. Did you  
know that whales are smart and  
get names. I have seen

# The ocean giant

Did you know whales can grow up to 60 feet long. Two school buses are as large as the biggest whale. A whale has the biggest brain in the world. The brain weighs 20 pounds.

# It's time to Eat

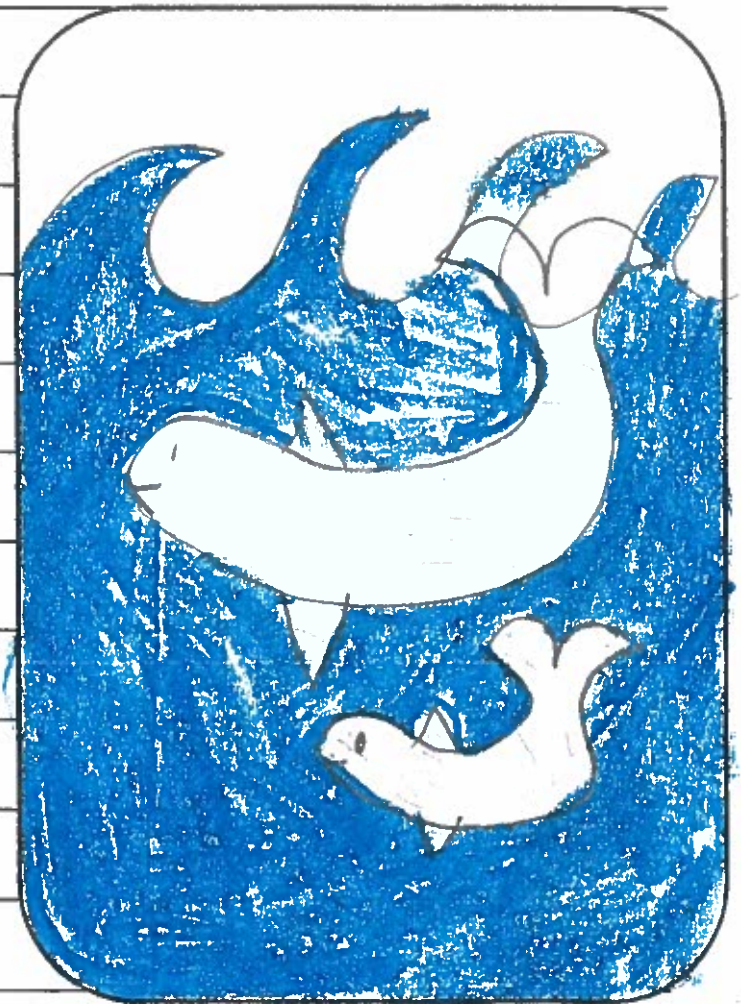

Whales eat  
where it is warm.

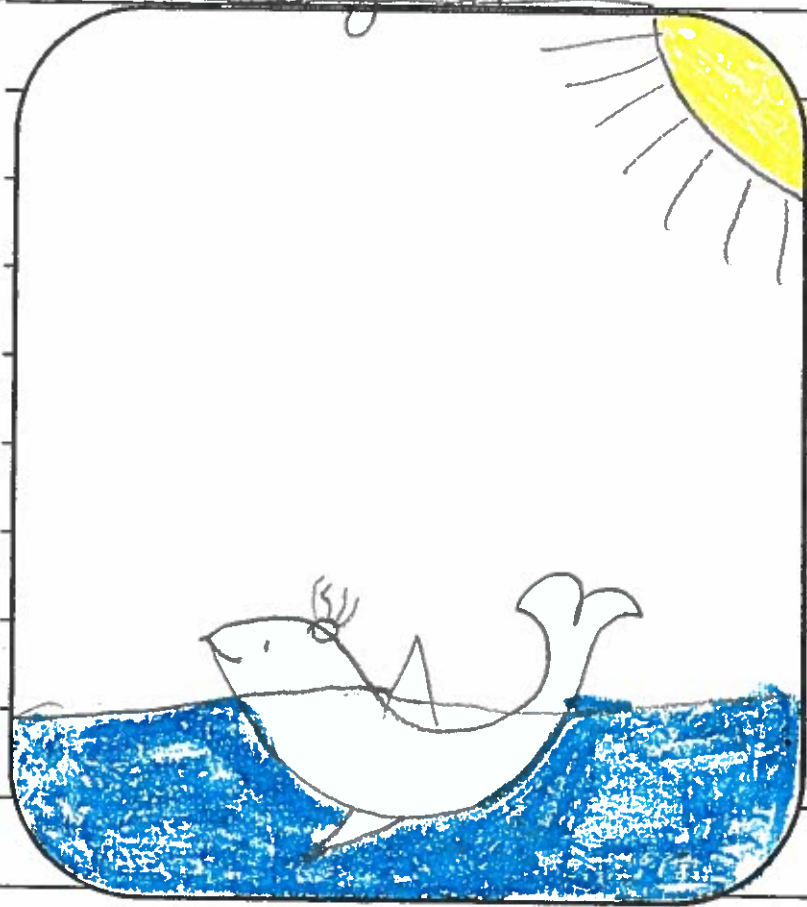

Whales love to eat giant Squid. Killer whales eat some whales. And killer whales eat polar bears. Blue whales eat krill. Krill is blue whales diet food.

## About Whales and Calfs

Calfs drink there moms milk. Calfs stay with there pod. Also calf s leave there pods beetween 4 and 21 years old. Orcas sometimes give birth in the fall! Sometimes blue whales and humpback whales give birth in the fall

# The Big breath

Whales can hold their breath for 20-90 minutes! The **blowhole** is used for breathing. Whales do not breathe underwater. When whales run out of oxygen - they come up to the surface.

Meet the author

Hi my name is Tayla. And I like to play soccer with my friend. And I like to bake with my family.

Blowhole : A blowhole is some thing  
what whales use for breathing.

Giant squid : Giant squid is a sea  
creature that lives in the ocean.

Poeler bears : Poeler bears is an animal  
that lives in the woods.
